for \$30 per person.

**Sheree Duff, RDH, MS**

is the founder of the two dental hygiene and two dental assisting programs, fully accredited by the American Dental Association for Baker College on the Port Huron and Auburn Hills campus locations. She currently is the Associate Dean of Dental Sciences for Baker College.

She has taught numerous dental hygiene courses over the last 18 years, however her passion remains in the field of periodontics. Early in her career, she worked full-time in a periodontal specialty practice for more than 10 years. She has taught at several dental hygiene programs in the state and is the past Administrative Manager of the dental department at Mott Children's Health Center.

Sheree is a member of the ADHA, MDHA, ADEA, OSAP, OCDHA, MDHEA, and currently serves on the Board of Governor's for the University of Michigan School of Dentistry. She is active on a variety of campus committees and is the past recipient of the 2002 St. Clair County's Hygienist of the Year award. Most recently, she was presented with the 2010 Colgate National Award of Distinction for her advancements in the field of dental hygiene. Additionally, she was the 2011 University of Michigan, School of Dentistry, Dental Hygienists' Association, Alumnae Award.

Sheree has presented numerous seminars around the state and in Canada. Her experiences have provided her with the unique opportunity to synthesize an approach to clinical practice that not only is evidence-based but is focused on the art and science of dental hygiene.

*The evening presentation will review the traditional hand-activated dental scaling instruments along with an informative discussion on the plethora of new instruments available for treatment of the periodontal patient. A special emphasis will be on the micro, mini, and extended shank instruments along with an introduction to reinforcement scaling techniques.*

Sponsored By:

## After This Seminar You Will Be Able To:

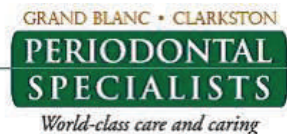

Describe assessment and treatment instruments used in delivering dental hygiene care to clients with healthy or diseased periodontiums.

Understand the variations in instruments shank length, curvature, flexibility and angulations of traditional and newer hand scalers available today.

Manage the care of hand instruments, including current sharpening techniques to emphasize proper instrument blade adaptation and angulation.

Describe protective scaling strategies and reinforcement scaling.

Better formulate instrument decision planning to assist with efficient and productive clinical chair-side treatment.
